Hi Jenny,

Yes, I should be all set with the meetings estimates.

Unfortunately, we don't have what I would consider "expertise" on sediment TMDLs and forestry issues within Cadmus. However, I have a good network of experts on numerous subject matters that I can reach out to if you'd be interesting in seeing a few options (e.g., bios of any potential experts). If so, is there anything more that you can tell me with regards to what you are looking for? Also, is it a single expert on sediment loading issues from forest lands (in the PNW) that you are looking for, or an expert on sediment TMDLs from a modeling perspective? Or an expert on forestry issues?

Laura

Subject: Question on Mid-Coast TMDL estimate

Hi Laura,

I see that David Waltz gave you an estimate of the number of meetings and days for the Mid-Coast TMDL. Do you have a final cost for the amount that will be used through April 2013?

Also, I was wondering whether Cadmus has expertise on sediment TMDLs and forestry issues.

Thanks, and have a great holiday!
